

MPMSAA GreenPlumbers® - International Training & Accreditation

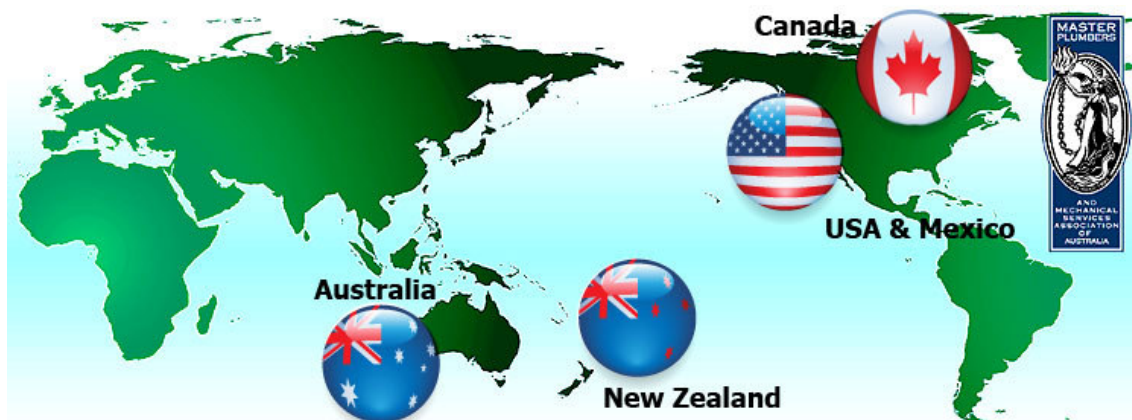

It is estimated that 70% of the environmental water and energy savings achievable within new and existing buildings is plumbing related work. Heating, cooling, hot water, water efficiency and the harvesting and use of alternative water sources all require a sustainable plumbing solution that ensures reliable service and protects public and environmental health and safety.

The Master Plumbers and Mechanical Services Association of Australia (MPMSAA) GreenPlumbers® FREE national training programs are designed to assist plumbers in understanding their role in relation to Environmental & Public Health, and to provide their customers with up to date information and advise on;

- latest technology and energy saving appliances
- Practical Appliance & installation knowledge
- environmental impacts of plumbing services, appliances and household practices
- consumer information
- energy / water / cost savings (short term and long term cost comparisons and environmental benefits)
- Nationally Accredited Training / Qualifications.

Since 1999 there are more than 6800 plumbers representing over 4000 plumbing businesses that have completed one or more GreenPlumbers® training sessions from across Australia, with over 200,000 visitors per year going to the greenplumbers website by the wider community looking for environmental products and local environmentally trained plumbers- www.greenplumbers.com.au

This program has recently been expanded into New Zealand and North America, as Governments realize the import role the plumbing industry can play in creating a more environmentally sustainable future.

To find out further information on our free national training program please contact the office on 03 9927 5800 or visit the website at www.greenplumbers.com.au

Or to use an accredited GreenPlumber® please contact the customer call centre number on 1300 368 519 or visit the website at www.greenplumbers.com.au
