

Walter J Pratt Pty Ltd

Water Treatment • Hydraulic Services • Environmental Solutions

Walter J Pratt Pty Ltd have recently completed the water services for the worlds first low energy, low water consumption and truly sustainable office building at 60L, **The Green Building**, Carlton. Our company provided design, installation and commissioning of water related components including:

Green Building, Carlton

Low energy wastewater treatment and recycling for non-potable uses such as toilet flushing and roof garden watering.
Rainwater collection and treatment to meet the potable water demands of the building such as drinking water, hand washing, cleaning, dishwashing and showering.
Renewable energy hot water supply
Low water consumption fixture installation.

In another world first, Walter J Pratt Pty Ltd has designed, installed and commissioned a wastewater and trade waste recycle system at The Age Print Centre in Tullamarine. All recycled water is reused in the printing process with no wastewater from the building going to sewer.

The Age Print Centre, Tullamarine

Southern Cross Redevelopment

We currently have the contracts to provide wastewater treatment and water recycling for two large Melbourne CBD office towers.

The Southern Cross Redevelopment is a 39-storey office tower with retail tenants located at ground level. We collect 75% of the wastewater generated by the building, treat it and reuse that water to flush toilets.

The Urban Workshop, 50 Lonsdale St is a 33-storey office tower with retail tenants located at ground level. We collect 75% of the wastewater generated by the building, treat it and reuse that water to flush toilets.

At Walter J Pratt Pty Ltd we assist our clients in assessing the viability and benefits of employing 'green' technologies. We turn original concepts into reality, providing a guaranteed maximum price from initial design. We provide life cycle costing to assist our clients in making an informed decision on the viability of green options.

In addition to the above projects we have delivered more than 2000 commercial and industrial projects in over 35 years of operation. Our list of diverse projects include:

Trail of the Elephants, Melbourne Zoo - Elephant pool water treatment
RMIT Biomedical Process Plants - Trade Waste
Melbourne Sports and Aquatic Centre - Pool water treatment plant
National Gallery of Victoria - Water feature and hydraulic services
Rod Laver Arena - Hydraulic services
Federation Square - Hydraulic services
Melbourne Museum - Artificial creek treatment system
Yarra Hill Winery - Process water treatment with constructed wetland

Federation Square, Melbourne

Our services include consulting, design, documentation, construction and maintenance of commercial and industrial water systems including:

Recycle & Rainwater Treatment at 60L

- Recycled Water, Trade Waste & Waste Water Treatment Plants
- Water Conservation Building Projects
- Commercial and Industrial water audits
- Rainwater Harvesting Projects
- Renewable Energy Hot Water
- Commercial Swimming Pool and Water Feature Treatment Plants
